Question 21 (b) (ii)

Criteria	Marks
• Shows how to calculate the size of the booking table in megabytes	2
• Provides some relevant information	1

Sample answer:

Answers could include:

To calculate the size of the booking table add together all the field sizes to get the total for the number of bytes for 1 record. Then multiply by 200 (the total number of records in the booking table). Then divide by 1024 $\times$ 1024 to get the answer in megabytes.

Question 21 (b) (iii)

Criteria	Marks
• Provides a correct SQL statement	3
• Provides a partially completed SQL statement	2
• Provides some relevant information	1

Sample answer:

```
SELECT First_Name, Last_Name
FROM Booking
WHERE No_of_guests >1
ORDER BY Last_Name ASC
```
